## Ass#3 - OpenCV with Android (Assign Feb 22)

--	--

Due March 10

I have given in on my original assignment, not that it can't be done, I have just had too many other things deter me this week.

I don't want us to fall behind.

For this assignment....you can use what ever resources you can find.

- You can use OpenCV and the example FaceDetection

or

- You can use Android Developers SDK FaceDetector

All you have to do is detect face and then an eyeball using a live camera stream on an Android device.

Just one eyeball.....preferably two.

First detect a face, then find the eyeballs.

## To Get Graded:

Due March 10th (demo must be done by 3pm).

1. Upload the code before the due date.
2. Demo the code to me before March 10th at 3pm.

### Demo times (all in EPS 109):

- Tuesday March 7th 10:30-11:30am
- March 8th After Quiz and 1pm to 1:55pm in EPS 109
  - Office hours 2-3pm
- Thursday March 9th 10:30am to 11:30am
- Friday March 10th....12-2pm.....(and office hours in my office 2pm to 3pm).

After 3pm on Friday March 10th you won't be able to demo until the week after Spring Break.
